FIVE CENTS THE COPY

## KITCHENS ASKS MORE REVENUES TO SAVE TAXES

Industries Should Pay at  
Least Cost of Water  
Supply.

## EFFICIENCY IS URGED

Plan of Relieving Net Bur-  
den on Taxpayers Is  
Suggested.

Efficient city government as ap-  
posed to a "cheaper and inefficient  
government which would come as  
the result of millage cut" was  
advocated by Mayor Gary Kitchens  
as the city budget for the year,  
calling for \$81,645, is ready to be  
submitted to the county excise board  
soon.

Although the estimate calls for  
about \$6,000 more than the six  
mill levy on city valuation, res-  
ponsibility for making the trim-  
ming should be left to the county  
excise board which probably will  
meet here August 15, the mayor  
said. The amount called for this  
year is practically the same as the  
city asked for last year, he ex-  
plained. The state board passes on  
the valuation of public service cor-  
porations and final word on the  
city estimate will be passed by the  
county excise board.

"One of the city commissioners  
is contending for a five mill levy.  
We all would like to reduce taxes  
and I am as strong for it as any-  
one, but we cannot afford to make  
sacrifices at the expense of a de-  
cent government," Mayor Kitchens  
said. "We must have adequate  
police protection, we must have pre-  
vention against fires, we need good  
sanitation, and we need good streets.  
I maintain that the city is willing  
to pay for these and it cannot be  
done on a smaller budget," he de-  
clared.

### Get More Revenue

The suggestion that Ada can get  
increased revenues from other sour-  
ces than direct taxation was passed  
out by Mayor Kitchens. Higher  
water rates to the bigger industries  
was advised as a method whereby  
the city can arrange to reserve  
much of its direct tax income and  
at the same time strengthen all  
departments of government. Water  
rates now being charged the bigger  
industries could be raised from 4 1/2  
cents on the 100 gallon to 7 or 10  
cents, or at least the cost of pro-  
duction he intimated. By this plan  
\$25,000 taxes raised under the six  
levy might be almost completely  
reserved for emergencies, the mayor  
said, and the city given what it  
deserves in the way of adequate  
government. Just where the cut in  
the estimate as submitted can be  
made, he was unable to say.

Even a city mill levy produces  
only about one-third of the money  
the city spends, he pointed out,  
and a burden can be taken from the  
shoulders of property owners by  
making revenues from other  
sources than direct taxation meet  
more of the city's expenses.

## DAVE HYBARGER GIVES CHICKASHA BARBECUE

Dave Hybarger, formerly of Pon-  
totoe county but now chairman of  
the county commissioners of Grady  
county, gave a barbecue recently for  
county officials at his farm east  
of Chickasha, according to word  
just received here.

Following is an account of the  
barbecue taken from the Chickasha  
Daily Express:

Friday evening at his farm three  
and a half miles east of Chickasha  
Dave C. Hybarger, chairman of the  
board of Grady county commissioners,  
entertained the county officials  
and employees, with their families  
at a barbecue supper.

"About 150 guests were present  
to do ample justice to the menu,  
which consisted of barbecued beef  
and mutton, with all the "trim-  
mings," plus a treat of honey taken  
from the Hybarger hives.

Several talks were made in which  
there ran strong plea for co-opera-  
tion among the officers of the county.  
Among those who talked were  
J. Roy Orr, assistant county attorney;  
J. E. Shelton, county judge;  
Tom McElroy, county commissioner  
and H. F. Allen, county superin-  
tendent.

### DISAPPOINTED WORKERS SET FIRE TO LUMBER

(By the Associated Press)  
LONDON, Aug. 8.—Disappoint-  
ment over their failure to obtain  
jobs at a timber company in East  
London which advertised for 50  
men, 5000 laborers today broke  
into the premises and set fire to a  
stock of lumber valued at 1,000,000  
pounds sterling. Considerable dam-  
age was done before five hundred  
foot and mounted police made way  
for a fire brigade.

## BOLD CHECK MAN LED HARD CHASE BUT WAS WINNER

A forged check, a gang of excited men and a scared negro were principals in a scene of confusion about 5 o'clock Saturday afternoon. The negro, who has succeeded in passing several checks over the city, had gone by several assumed names and encouraged by his success at other places, attempted to "get by with it," at Shaw's Department store.

Langford Shaw was approached by the "colored gentleman" with his scrap of paper, but when Shaw decided to take the fellow to the bank and investigate the matter, intending to proceed from thence to police headquarters if matters were not satisfactory, the negro decided his hash was ruined and bolted.

Dashing out of the front of the Shaw store, running a half block west on Main, turning through a store and coming into an alley, he headed north down Broadway for Dark Town, lose on his heels came Shaw and others. But to their dismay he left them far behind. When cars gave chase it was found that the attempt was useless.

Circling back from Dark Town the negro headed south coming by the ice plant, on to the Sledge Lumber yards, through the Ada Motor Company garage and south on Constantine avenue. He was seen later by employees of the Ada brick plant going down the Katy right of way, still running. He has not been seen since.

## PARTS OF STATE SUFFER FOR RAIN

Central and Southwestern  
Counties Dry Says the  
Crop Report.

OKLAHOMA CITY, Aug. 8.—The  
week just closing was generally fair  
with some of the warmest weather  
that has been recorded this sum-  
mer. Light scattered showers fell  
over the western and northern  
counties. The heaviest precipitation  
of the week was recorded in Bryan  
county on Wednesday. The South-  
western, north-eastern and eastern  
counties are becoming very dry and  
will need immediate relief or crops  
in these sections will be cut short  
considerably.

Practically all of the early planted  
corn is made and late corn is con-  
sidered safe at present in all localities  
except the southwest, northwest  
and eastern counties, where mois-  
ture conditions were very low. The  
southwest counties report corn all  
readily damaged and unless imme-  
diate relief from the drought is re-  
quested, the heaviest precipitation  
sections of the state, the con-  
ceived the crop will be heavily  
damaged. The two heaviest produc-  
tive and the south-central counties,  
report the crop as excellent, with  
probable yields per acre as good as  
any year in the last ten.

The week has been a perfect one  
for threshing wheat and all indica-  
tions are that the crop is better  
than two-thirds threshed at this  
date, with yields running fair. The  
best returns per acre are found in  
the Panhandle counties and those  
adjoining. Wheat was damaged to  
noticeable extent by the continued  
rains of July and did not thresh  
out to the expectations of the farmers  
in the main wheat growing  
sections. All sources of information  
claim that the crop is selling free  
and that car facilities are better  
than for the past two years.

The oats crop is of poor quality  
due to damage from rains during  
July. Considerable Green Bug dam-  
age also helped to cut the state's  
total production for this year. A  
half crop this year is a fair esti-  
mate with a total production of  
between 25,000,000 and 30,000,000  
bushels, which is considerably below  
the ten year average for the state.

It has been ideal growing weather  
for cotton during the past week.  
The hot dry weather prevailing in  
practically all cotton counties has  
checked the ravages of the boll  
weevil to a noticeable extent; how-  
ever, the damage has already been  
heavy, especially in the extreme  
southern counties where some fields  
are reported as totally destroyed.

The production for this year is es-  
timated at considerably less than half  
that of last.

Other crops are reported in good  
condition with prospects of bumper  
yields. Truck crops and gardens are  
in need of moisture.

Pastures are better than the aver-  
age for this time of the year: in all  
sections except the northeast, east-  
ern and southwestern counties. Live-  
stock doing well, but shipments are  
very light on account of low prices.

### EXCESS IMMIGRANTS TO BE ADMITTED SOON

(By the Associated Press)  
WASHINGTON, Aug. 8.—Immig-  
rants in excess of July and August  
quotas, now held at various ports,  
will be admitted under personal  
bond and charged to the year's total  
Commissioner General Husband of  
the immigration bureau announced  
today, that November 11 is agree-  
able as the date for the disarma-  
ment conference.

## CITY TO RENDER MILITARY HONOR TO HERO OF WAR

Body of Second Returned  
War Veteran Will Be  
Buried Wednesday

## SAW MANY BATTLES

Gray Whisenhunt Cited for  
Bravery in Action by  
Adjutant General

Funeral services for Gray Whisen-  
hunt, son of Mr. and Mrs. E. W.  
Whisenhunt of 222 East Tenth  
street, will be held Wednesday  
morning at 10 o'clock at the Cath-  
olic church. A telegram from the  
army chaplain at Camp Pike, Little  
Rock, Ark., received by the boy's  
father today stated that the body  
was shipped this afternoon and  
would arrive in Ada Tuesday after-  
noon. He is Ada's second war veter-  
an returned for burial.

The body will be taken to the  
home where it will remain until  
Wednesday. Norman Howard post  
of the American Legion will have  
charge of the funeral and Father  
Charles of the Catholic church will  
preach the funeral sermon. Invitations  
will be sent to Stratford and  
Tupelo posts of the Legion to attend  
the services.

Private Gray Whisenhunt enlisted  
in May of 1917 at Oklahoma City  
and from there he was sent to an  
eastern camp. After little more than  
a month of training in the United  
States, he was sent to France as a  
private in Company K, 16th Infan-  
try of the First Division. He  
was given the greater part of his  
training in a camp near the front  
line.

While in active service he was  
killed at the battle of the Meuse  
Argonne on October 4, 1918. He  
also saw active service in four  
other large battles Montdidier-Noy-  
on, Aisne-Marne, St. Mihiel, and the  
Defensive Sector, going over the  
top several times. He was cited  
for bravery in action by the Adjutant  
General.

Gray received his schooling at  
the Sacred Heart Academy in Potta-  
watomie county, where Father  
Charles was a teacher. He also  
attended the East Central Normal  
for more than a year, after which  
he taught school one year before  
his enlistment. At the time of his  
death he was 21 years old.

Whisenhunt was well known in  
Ada and the surrounding communi-  
ty, having lived a greater part of  
his life here. He was an only son.  
Full military honors will be given  
him.

## SEVERAL MAY BE IN PRISON PLOT

More Than One Helped in  
Killing Demmer and  
Kolze, Belief.

(By the Associated Press)  
CHICAGO, Aug. 8.—The poison-  
ing of Mrs. Marietta Kolze and  
John Demmer, eight years ago, was  
the work of more than one person,  
according to the testimony of two  
unnamed witnesses yesterday before  
coroner Peter Hoffman.

The Kolzes and Demmers lived in  
the same house in Spangler Park,  
Illinois, it was said, Fred Kolze and  
Mrs. Demmer consolidating their  
families after the two deaths,  
with Mrs. Demmer acting as house-  
keeper.

The last week Mrs. Demmer ad-  
mitted, it was said, that she was  
jealous of Kolze's attention to  
another woman and that he told  
her that he had "done away" with  
his wife. She said she thought  
that Kolze used white powders.

Upon the death of Fred Kolze  
on July 18 an investigation was  
begun which has disclosed, it is  
said, that he, his wife and Mrs.  
Demmer's husband, had all been  
poisoned, the poison being slowly  
administered, probably through  
food.

Mrs. Demmer was arrested and  
released temporarily on a writ of  
habeas corpus. A report is expected  
today on a fourth body exhumed  
by Coroner Hoffman, that of Mrs.  
Lena Kolze, mother of Fred. Chem-  
ists have been seeking traces of  
poison in Mrs. Kolze's body.

### CHINESE AGREE ON NOV. 11 FOR MEETING

(By the Associated Press)  
WASHINGTON, Aug. 8.—Immi-  
grants in excess of July and August  
quotas, now held at various ports,  
will be admitted under personal  
bond and charged to the year's total  
Commissioner General Husband of  
the immigration bureau announced  
today, that November 11 is agree-  
able as the date for the disarma-  
ment conference.

## GOVERNOR SMALL WILL MAKE BOND SOON IS BELIEF

(By the Associated Press)  
SPRINGFIELD, Ill., Aug. 8.—  
Governor Small, accompanied by his  
son, Leslie, Colonel A. Inglesh, ad-  
ministrative auditor, and Charles  
Jenkins, director of the department  
of public welfare, arrived in Spring-  
field late last night.

George B. Gillespie and James M.  
Graham, the governor's attorneys,  
visited the county clerk's office  
early today and inspected Sheriff  
Mester's bond. They remained only  
a few minutes but this visit was  
believed to have been an indica-  
tion that a legal battle was pending.

Sheriff Mester on learning of  
Governor Small's return to the cap-  
ital, said he expected the governor  
to go to the court house and ar-  
range bond.

SPRINGFIELD, Ill., Aug. 8.—  
Emerging from a two-hour confer-  
ence with members of his cabinet,  
Governor Small this afternoon de-  
clared that he had not faltered in  
his determination to protest against  
arrest.

(By the Associated Press)  
EUREKA, Cal., Aug. 8.—Passen-  
gers and crew of the steamer Alaska  
were blown from the decks of the  
vessel into the ocean when the  
ship's boilers exploded as the  
Alaska started sinking after twice  
striking on Blunt's Reef Saturday  
night, survivors brought here said  
today.

The steamer Anyox today brought  
166 survivors of the wreck to  
Eureka. Seventeen dead were  
also brought here, including three  
women and a child. There were  
31 others missing and believed  
dead. Twelve of the dead have been  
identified.

The full story of the sinking  
of the Alaska did not become known  
until survivors landed here. It was  
brought out that the Alaska was  
proceeding toward San Francisco  
in a dense fog when she struck a  
submerged ledge of the reef, the  
shock being almost instantly follow-  
ed by another as the vessel struck  
an outcropping of the reef above  
the water.

The Alaska struck the reef shortly  
after nine o'clock. Immediately  
a wireless asking aid was flashed.  
Five miles away the steamer Anyox of  
Vancouver, B. C., picked up the  
message and disregarding the fog  
and the danger of finding the same  
rocks as the Alaska, put on full  
speed and came to the rescue. At  
9:30 the Anyox received the Alaska's  
last message.

"We are sinking by the head."  
Before the Anyox could reach the  
stricken Alaska, the latter had sunk.  
In the fog the Anyox came upon  
a lifeboat with survivors from Alaska.  
The boat was partly filled with  
sea water and oily scum. The oil,  
the survivors said, had been blown  
over them and in their boats by  
the explosion of the boilers, which  
wrecked the midship.

He also presented a list to show  
the price decline in wholesale meat  
products during the past year rang-  
ed from 60 to 47 percent. Practi-  
cally all byproducts are lower than  
in 1913, he asserted.

"The decline of packing house  
products," Mr. Wilson said, "would  
be conclusive proof of the statement  
made by the packers that the busi-  
ness is governed by the law of  
supply and demand and is not and  
cannot be artificially controlled."

## Local Man Captures Scholarship Honors in University Work

NORMAN, Aug. 8.—While some  
Sooner were making history for the  
University of Oklahoma on the foot  
ball field by winning the Missouri  
Valley grid championship and still  
others were working on the debate  
platform, 109 out of the total en-  
rollment were successfully striving  
for superior grades.

And, according to registration  
office statistics just completed by  
George B. Wadsack, assistant regis-  
trar, 20 Sooners made an "A" average  
in grades, or a perfect  
scholarship during the fall and  
spring semesters of the 1920-21  
university year. Eleven other stu-  
dents made an "A" average for one  
semester, and ninety-three students  
made an "A" minus average for the  
entire year. A straight "A" average  
means that student made be-  
tween 95 and 100 percent in each  
course taken, while "A" minus is  
equal to from 90 to 95 percent, accor-  
ding to the grade schedule used  
by the University of Oklahoma  
faculty members.

Among the students who made  
these superior grades is Elbert O.  
Davis of Ada, who made an "A"  
minus average for both semesters.

## FOUR POISONED BY DRUG BOUGHT TO BANISH BUGS

(By the Associated Press)  
MINNEAPOLIS, Aug. 8.—Charles  
McNulty, 54, is dead and three  
other persons are in the hospital  
as the result of poisoned pancakes  
eaten for breakfast yesterday morn-  
ing.

A poisoned powder had  
been placed in a flour sack to  
kill insects and when Mrs. J. D.  
Dillon went to make pancakes for her  
boarders she accidentally took flour  
from the wrong sack.

PARENTS SUFFERING FROM  
LONG ABSENCE OF SON

### (By the Associated Press)

MUSKOGEE, Aug. 8.—W. E.  
Etridge, father of missing Mal-  
colm Etridge, was today confined  
to his bed unable to see friends  
as a result of the shock of his son's  
continued absence. Mrs. Etridge  
has been confined to her bed  
also, due to a nervous breakdown  
caused by worry over the fate

## AUTOMOBILE ACCIDENTS

When the number of deaths caused by automobile accidents in the United States was given out for 1920, the country exclaimed in horror. But the deaths this year thus far far exceed those of last.

It is evident that something must be done to correct this needless loss of life. Years ago accidents on the railroads caused hundred of deaths annually, but these have been all but eliminated. We must do something to correct the error in our highway and street traffic casualties. Here in our town Saturday, a lad barely escaped with his life. The same thing happened at Vanoss a few Sundays ago. Today, tomorrow or the next day may see the passing from this life many souls, victims of speed and carelessness.

More attention to the danger should be taken by both drivers of cars and pedestrians. It is true that drivers are often grossly careless and run down others without any excuse whatsoever. Fast driving is dangerous, and should be indulged in only where the driver himself is likely to get hurt. If a person has no more regard for his own life than to take chances with it, we see no reason to worry. Let him get thru with it if he wants to and learn what is on the other side. He should not endanger others, however, and it is when he does endanger others that the law should be stern and unrelenting.

But the trouble lies not with the drivers alone. The boy who was injured Saturday was one of two boys riding a bicycle on one of the busiest streets of the city. He was sitting on the bar in front of the boy who was controlling the bicycle, thereby cutting off partially at least the view of the other.

The boy who was run down at Vanoss a few weeks ago was playing baseball on one of the streets when the car struck him. It is rather common practice in many of our towns and cities for the children to play in the streets. A mother would never feel at peace with her child playing on a railroad, and yet the modern automobile is almost as dangerous as a locomotive.

We must stop this useless waste of human life. The law about speeding should be mercilessly enforced. Parents should keep their children off frequently traveled streets. The laws and rules of the highways should be religiously observed by all drivers. It is better to be a minute late than to be a life time late.

In Texas they have suspended sentence law which makes it possible for a jury to give a man the limit on paper and then order the sentence suspended. In Oklahoma we have had a string of governors who either from sentiment or else to accommodate some influential friend employed by the convicted ones to represent them, have turned loose in droves felons who richly deserved the electric chair. There is very little difference in the actual working of the two plans, but it is just such maneuvers in defeating the ends of justice that makes it possible for the Ku Klux to flourish and often causes lynching in cases where sure and speedy justice is needed. It is too hard to get law violators into prison and too easy to get them out.

One of the absorbing topics of the day is the contest over railroad rates. The railroads argue that not to maintain high rates is to kill the goose that lays the golden eggs, and the public, both producers and consumers, insist that being unable to ship produce to market is what is killing the goose that lays the honest to goodness golden eggs. Looks like it may end in both geese being slaughtered.

The Daily Oklahoman is doing Oklahoma a valuable service in playing up the beauty spots of the Sooner state. We have mountains, streams and wooded dells that are too much unknown among our citizenship. We can spend less money and have as good time by staying in our own state as we can by taking long journeys.

The showers today are needed to give cotton needed moisture, the farmers say. Gradually the boll weevil seems to be letting up in his violent attack on this crop. Whether the cloudy weather of the last forty-eight hours will give him additional life remains to be seen.

The desire to defeat Ada's ball club seems to be widespread over the Southwest. The consistency with which all fail to do it, however, is amusing.

At Portales, New Mexico, the farmers consider they are making money when they can produce 200 bushels of sweet potatoes an acre, after going to an enormous expense to irrigate. This county can produce twice that many without irrigation, and produce a tuber that is just as sweet and that ships as well.

## The Evening News

## FEDERAL AGENT TO STUDY BOLL WORM

Pink Creeper Is Menace to Crop in Sections of County.

(By the Associated Press)

OKLAHOMA CITY, Aug. 8.—Federal investigation into the life of the pink boll worm, its origin, and how it is being imported into the United States, was announced here today, with the receipt of word from H. H. Shultz, federal crop statistician for Oklahoma, who was recently commissioned by the secretary of agriculture to conduct a thorough investigation.

The results of his investigation, will of course not become known until officially announced by the department of agriculture from Washington and the word today is the only recognition of his work which may come until the investigation is completed, according to officials of the Oklahoma agricultural department.

Shultz departed July 29, for Old Mexico. He stopped a short time at Houston, Texas, for a conference with the federal crop statistician there who has written a treatise for the department on the pink boll worm, which since 1916 has become an ever increasing menace to the United States cotton crop.

The pink boll worm, according to the department of agriculture originated in South America, and in old Mexico. It since appeared in Texas, but was banished partially in 1917, when state laws against the importation of seed from any infected district in Old Mexico were passed, and in some places along the border, non cotton zones some of them ten miles in width established.

This non cotton zone, it was explained, was established to prevent carrying of the infected seed by natural means into the free region. Some evidences of the smuggling of seed into the United States, particularly into Arizona and New Mexico, were discovered some time ago, it was announced, by department men, working along the border in an attempt to control the shipments of cotton seed.

The pink boll worm is known to have lived in the larvae stage for two years, inside the cotton seed. In a series of experiments conducted by the department of agriculture, the larvae was found healthy, and the exact length of life was never fully determined.

The pink boll worm recently penetrated into an Oklahoma county, the shipment of cotton seed, which came from Mexico, by way of Arizona, was only burned and completely destroyed after the county sheriff, together with the county farm agent and officials from the department of agriculture demanded it.

### O. U. WILL HAVE OWN CAMPUS WATER SUPPLY

WASHINGTON, Aug. 8.—Recent investigations by the U. S. Geological Survey are held by its experts to indicate that in the Rocky Mountain states "there are enormous quantities of oil shales which can be made to yield hydrocarbon oils to a much greater extent than we can hope to obtain from our wells."

The shales are said to constitute a tremendous potential oil reserve. "The oil shales of this country," says the report, "contain enormous quantities of oil, but large amounts of money will have to be invested before the oil shale industry becomes of commercial importance. Estimates by various engineers of the cost of a complete retorting plant, handling 1,000 tons daily, are between \$4,000,000 and \$5,000,000."

"In this country the oil shale industry can not be developed overnight and probably can not attain success until large sums of money have been spent in perfecting mining, retorting and refining methods. A company to be successful, whenever oil shale operations become commercially feasible, must be able to employ the best technical, business and engineering skill available and be prepared to operate on large scale, and be financially strong enough to wait several years for any large return on the money invested."

The report declares that it is unfortunate that a large number of the many companies organized to deal with oil shale are devoting their efforts to stock selling rather than assisting in building a firm basis for the industry."

A summary of the report follows: There are no commercial oil shale plants operating in this country at the present time, although there is a well established industry in Scotland.

Many American shale deposits are richer in recoverable oil than Scotch shales now being worked, and probably nearly equal in nitrogen content, which is a measure of recoverable ammonia.

### O. U. INSTRUCTOR TO VISIT BATTLEFIELDS

NORMAN, Aug. 8.—(Special) John O. Moseley of Mangum, sailed August 3 from New York on the George Washington for France with the American Legion delegation to visit the world war battlefields.

Moseley will spend approximately forty days on the continent before crossing the channel to enter Oxford October 1. Moseley was a Rhodes scholar in Merton college before the war, leaving to enter the U. S. army. He has been assistant professor of Latin, University of Oklahoma since he was discharged from the army.

## City Briefs

If, walking in the forest gnarled and old,  
Some wind-swept, magic day,  
Behind the shelter of a moss-hung tree.

The laughing face of Pan peers out at me,  
I shall not run away—

But rather, with surprise and joy grown bold,  
"Oh, tarry here, Wood God!" my prayer will be—

"One little hour, and play Upon your pipe of reeds those notes that make

The timid nymphs hide listening in the break.

Though greatly longing, they, To yield them to your luring melody!

Play me the message of the whispering trees—

The mystery of the pine,  
The sorrow of the oak that sighs and grieves—"

Tune my dull ears to hear the singing leaves—"

And Pan, whose heart, like mine, Loves the deep woods, will pipe me songs like these!

—Mazie V. Caruthers.

Reeds Give Barbecue  
H. F. Reed and wife of seven miles south of Ada entertained about 35 guests from Ada and neighbors of the community in an all day picnic and barbecue at the farm on Jack Fork creek Sunday.

From the time the crowd began assembling early in the morning until late in the afternoon, the Reeds kept the chain of entertainment and hospitality unbroken. At the noon hour, big tables were spread along the cool banks of the creek and these were laden with barbecued mutton, fried chicken, all the vegetables of the farm, pies, and cakes. In the afternoon, cold watermelons were brought from hiding and the entire party was fed again. Later, an immense freezer of ice cream was tapped as a finale for the picnic.

Swimming in the natural tank near the farmhouse furnished afternoon entertainment for the party.

Besides neighbors of the Reeds who enjoyed the picnic, the following from Ada were entertained: Mrs. Lura Skinner, Mrs. E. L. Hawking and family, Mr. and Mrs. W. R. Riddle and family, Miss Ruby Andrews, Mrs. J. K. Reed and daughter, Magdalene, John Skinner, Powell West, George Erwin, and Dewey Neal.

\*\*\*

W. N. McClure of Ardmore is in the city this evening visiting friends.

\*\*\*

Miss Helen Moser is visiting her friend, Miss Mallie Stocksbury at Shawnee.

\*\*\*

C. E. Wingo, former manager of the cotton oil mill at Ada, is in the city on business matters and visiting his mother, Mrs. W. A. Wingo. Mr. Wingo is now manager of the oil mill at Sulphur Springs, Texas.

## HOW TO FIGHT THE BOLL WEEVIL

The extreme hot weather of the past week did much to check the ravages of the boll weevil and with proper attention a good cotton crop may yet be made. There are not enough of the old weevils to sting all the squares and if the young ones now in the larva stage can be killed, and the cotton kept growing and putting on more squares a fair crop can be expected.

It requires from fifteen to eighteen days for the weevil to develop from the egg. Loose dust is hotter than the hard dirt and if the squares fall on this it is pretty certain that the square will dry up and leave the larva without food on which to develop. Therefore, it is necessary to keep plowing the cotton, just enough to keep the cracks filled up and a mulch on top. Unless the cotton is high enough for the cultivator to shake off the stung squares a brush should be attached, thus knocking off the squares where they will dry up, instead of leaving them on the stalk where they will be shaded and the larva protected.

This will also keep the cotton growing and putting on more squares and a crop can be made in spite of the presence of the weevil. This is the method employed in places where the weevil longs for its menage and crops are made there.

There is no use talking about killing the weevil after he is fully developed, the only chance is to keep the ground stirred and kill the weevil in the larva stage before he can develop and increase to such an extent that it is impossible to deal with him.

## FAMOUS STATUE OF JEANNE D'ARC IS REPLACED BEFORE RHEIMS CATHEDRAL

Photo shows the officials of the Society of Soldier Authors of France grouped about the reset statue of Jeanne d'Arc.

The celebrated statue of Jeanne d'Arc, the savior of France, which was removed from the front of the Rheims cathedral during the German bombardment in the war, has just been replaced in its old position.

## COW IS SHOWN AS HELP TO FARMERS

### Oldest Teacher of Human Race Teaches Thrift and Economy.

Make the Cow Your Partner on the Farm," was the keynote sounded by H. S. Mobley of the agricultural extension division of the International Harvester company in his talk to a large crowd of farmers and business men at the county court house this afternoon. He encouraged home owners, and especially farmers, to take the cow into partnership, explaining how this would prove profitable.

Chart illustrations were used to emphasize his remarks on the milk cow and dairy industry in general.

He showed that the same amount of time spent by a man and wife and two children with 15 cows and 30 acres of land would bring in more each day than a cotton crop on the same amount of ground, eliminating the element of chance that is an important factor in raising a cotton crop.

Cow Oldest Teacher.

"The cow is the oldest teacher of the human race," he said at the beginning of his talk. "She shows that the little accumulations each day, while they do not amount to much themselves, assume amazing proportions when added together.

Farmers on average have not acquainted themselves with the numerous principals of economy and thrift to the extent they should," he said. "My experience that the cow is a greater help in economising than any other domestic animal. The reason farmers fail to stay and care for milk cows is that it takes work, and lots of it."

Will Carpenter

Will Carpenter died Sunday at 1 p. m. at his home in Frisco. He was 40 years of age. The body was shipped to Vernon, Texas, for burial.

Mr. Parks was taken to Oklahoma City for a series of three operations recently. He was accompanied there by Dr. Shy of Stratford. Relatives here for the funeral were Mrs. L. S. Parks and five children, two brothers and wife of Lindsay, John brothers, Joe Parks and family and P. E. Parks and wife, Lindsay, John Lamb of Del Rey, Florida. Mrs. Maggie Harbold, a sister of Ada, and Mrs. K. C. Parks of Ada.

Funeral services of L. S. Parks of near Stratford who died in a hospital at Oklahoma City August 5, were held at 231 West Thirteenth street yesterday afternoon. Burial was in Rosedale cemetery. Rev. Dryden of Stratford officiated at the funeral.

## From Small Wagon to Large House Is Remarkable Record of Capital News Stand in Period of 17 Years

(By the Associated Press)

OKLAHOMA CITY, Aug. 8.—In 1904, when Oklahoma City, compared to cities of the east, was a mere village, A. F. March of Chicago, a news vendor, sent his son to Oklahoma City to sell papers. The small stand which he established then, at Main and Broadway, carrying the agency for two newspapers, and his only stand a small wagon with two shelves for news, was the foundation for what is now recognized by credited agencies as the largest single news stand in the world.

This newsstand, near Main and Broadway here, scarcely a hundred feet from where the original March stand was established sells 160 different daily newspapers, and more than 400 publications outside of those.

The romance of American business is written by the struggle of the Marches, father and son, after the father came to Oklahoma City. The boy first took up his stand in front of what was then the Night and Day Bank. For six months, he sold from his cart, and then from a shelf on the outside wall of the bank. A city ordinance was passed which banished him from the sidewalk, and he took a corner inside the bank, and wrote his father to come.

### BUSINESS INCREASED

On his father's arrival, the two leased a lot next to the Night and Day Bank, 6 by 25 feet. This they fenced off, and their business gradually growing, they stayed for nine years. A building next door, then housing a millinery shop, closed suddenly and the Marches obtained a lease.

They moved the day following, and established their stand at the place the present largest newsstand now occupies.

A. F. March, in the years he

kept the stand, had only one rule he said. That was never to allow anything but printed matter sold in his shop. No candy concessions however attractive were taken by him. Cigars and tobacco of all kinds were barred. He told of several times that firms had offered to pay his entire rent, if he would allow them to place a show case in among his books and papers.

"Nothing doing," he said.

came, after father and son had worked together 15 years, the boy became ill, and died, March, losing interest in the business, sold it to C. E. Stevenson, the present sole owner and proprietor. He, with two brothers, W. L. and E. V. Stevenson, now operate the stand, keeping it open 18 hours a day.

"Mo," said C. E., when asked if he would allow any other concession in his news stand. "I'll follow March's advice. He said, 'stick to one thing, learn all you can about it and if its news, sell news, all kinds of it, but sell that alone. That's the way to be successful."

Don't suffer the misery of indigestion when you can get relief from Prickly Ash Bitters. It eases pain and drives out badly digested food. One dose does the work. Try it. Price \$1.25 per bottle. Gwin and Mays Drug Co.

"The Faith Healer" at the McSwain That the motion picture is the greatest form of entertainment is not questioned; that it is superior in educational powers all leaders agree—that it has a great moral uplift, that is portrayed from the screen to the hearts of the people who see them are admitted by every social and civic organization on earth. When such pictures as "The Miracle Man," "Everywoman," and "The Straight Way" are shown people flock to see them for they are few.

Now to see them comes "The Faith Healer" the most talked of photoplay of the year. Critics say it is a better picture than anything yet produced. It's a Paramount super special with an all star cast. The starting hours of each show are 12, 2, 4, 6, 8, 9:45. Special music will feature the picture and we are showing it at a price so everyone in Ada can see it. Prices 10 and 25 cents. If you haven't got the price we want you to still see it. Come and ask for the manager.

The difference between opportunity and the kicker is that opportunity knocks but once.—American Legion Weekly.

Official statistics show refineries have turned out more "gasoline" and less kerosene than in the preceding year. Maybe this explains why Lizzie is sometimes unable even to hiccup.—Dallas News.

## "UNIVERSAL" FROCK HAS SPANISH AIR

This black satin frock shows a decided Spanish influence. The alcordion pleated skirt is hung with hair tassels of silk, which form an overskirt effect. The little jacket which looks like a diminutive shawl is edged with white and fastens with a large black and white ornament. The frock is called the "universal" frock because when the jacket is removed the dress can be worn as a sleeveless evening or dinner gown.

## ENCAMPMENT FOR ADA MEN DELAYED

Local Battery Not to Go Before August 26; Plan New Unit.

Major-General Charles F. Barrett from Oklahoma National Guard headquarters, Oklahoma City, was in Ada today in conference with Captain Robert Kerr of the local battery. He was on his way to Roff to inspect the new headquarters unit being organized by W. O. Pratt and started that Federal inspection will be given at an early date. The Ada battery of artillery will not go to camp before August 26.

There is a false impression prevalent in this state, said the Major in speaking of the National Guards unit. "Some think we are doing more than we should in organizing these units. As a matter of fact we are entitled to 800 men for each Congressman and United States Senator, making a total of 8,000 men for the state. At the present time we have only 4,500. We still have 3,500 more men to muster into the service before 1924, the time we are to have the 8,000.

"Oklahoma is not nearly up to the requirements than most states.

It has led in the percentage of men in the service for two or three years. At this time we have 95 percent of the requirements.

To Complete Units  
"During this year we will complete the artillery and medical units and several divisional units. Oklahoma will get as her part of the national government allotment one brigade of infantry, one brigade headquarters and one brigade of artillery with brigade headquarters and divisional troops for the 45th Division. This will give Oklahoma two brigadiers-general and one major-general.

"The infantry brigade has been organized and is commanded by Brigadier-General Charles E. McPherson of Durant. The first field artillery of which the Ada battery is a member and of which the Roff boys are to be the headquarters battery will be completed by the organization of service battery. The Second Field Artillery, 155 MM. has but two batteries remaining to be organized, one of which is now being formed at Okmulgee and the other at Oklahoma City.

"Federal recognition of the Ada battery is expected at anytime and requisition for equipment has already gone in. Every effort is being made to have the battery fully equipped at the earliest possible date. It has not yet been settled whether the Ada batteries and others inspected in July will be authorized to attend the present series of encampments. The Adjutant-General's department is making every effort to let the Ada battery attend."

May Get Service Company

The general also said that Ada has an opportunity to get a Service company. This will require around 100 men, included in which will be a military band of from 20 to 28 men. The company, he says, would mean much to Ada in a financial way as well as in helping keep alive the patriotism and make citizens take more pride in the town.

Captain Kerr is of the belief that this company will be organized though no steps have been taken.

## PRINTING FIRMS NOT TO MAKE CONTRACTS

OKLAHOMA CITY, Aug. 6.—Fourteen printing establishments signed an agreement this week that they would not make contracts with any of the printing craft unions for a period of five years, according to an announcement of open shop officials Friday night. The signers of the agreement include nearly all of the large printing shops of the city, who have been operating under the open shop plan since the strike of the various crafts several weeks ago. Among them are the Western Newspaper Union, Harlow Publishing company, Smythe Printing company, Warden Printing company, Western Bank Supply company, Walker-Taylor company, Times-Journal Publishing company, Spenny Printing company, Turnbull-Pottmeyer company, Live Stock News and others.

Members of the organization declare general conditions in the industry are good and aside from a number of cases of violence between employees and union pickets, they are having no difficulty in maintaining their shops on the open shop principle. With the exception of one or two firms, all of them have sufficient men to operate and they anticipate little trouble in continuing.

## PAPER MILL FOR HUGO MAY BE STARTED WITH NEW ELECTRIC SCHEME

HUGO, Aug. 6.—That the Hugo hydro-electric power site on Mountain Fork near here looks promising and will exceed local expectations considerably was the statement made yesterday by J. C. Jacobson, representing the Jacobson Engineering company of Minneapolis, Minn., one of the largest water power development concerns in the world. Mr. Jacobson has just returned from a visit to the proposed site and after a preliminary examination seems optimistic over the prospects.

Estimating the head or fall of Beavers Bend at 300 feet instead of 240, the conservative approximate of local engineers, Jacobson says its feasibility is not to be questioned.

The Jacobson Engineering company also establishes paper and pulp mills, and their representative states that if the power project is given the financial backing necessary for its realization, that he is almost certain that a paper mill can be established here. Because of the almost inexhaustible supply of pine available at a cheap cost, and then because of the cheap power that can be obtained.

## Irish Republicans Will be Released for Meeting Soon

(By the Associated Press)  
DUBLIN, Aug. 6.—All men of the Irish Republican parliament now in custody will be released, with one exception, in anticipation of a meeting of leaders of parliament called for August 16. Officials announced that the prisoners would be released August 16, according to a statement presented to the house ways and means committee by Secretary Mellon. The total income is estimated now at \$4,217,643,000 as against the estimate of \$4,547,643,000 contained in Mr. Mellon's letter of last April 30 to Chairman Fordney.

In the same time, the estimated expenditure decreased only \$11,864,216.

The Ford plant is to increase its daily output. That's rattling good news.—Dayton News.

## SHRINKAGE BOBS UP IN ESTIMATE OF U. S. INCOME

(By the Associated Press)  
WASHINGTON, Aug. 6.—A shrinkage in three months of \$330,000,000 in the estimated government income for this fiscal year, based on the present revenue law, is disclosed by the statement presented to the house ways and means committee by Secretary Mellon. The total income is estimated now at \$4,217,643,000 as against the estimate of \$4,547,643,000 contained in Mr. Mellon's letter of last April 30 to Chairman Fordney.

In the same time, the estimated expenditure decreased only \$11,864,216.

JAPAN ACCEPTS NOV. 11  
AS CONFERENCE DAY

(By the Associated Press)

TOKIO, Aug. 6.—Japan has

agreed to November 11 as the date

for the beginning of the disarma-

ment congress in Washington as

suggested by the United States, ac-

cording to this morning's news-

paper.

MRS. SANDRIDGE TOLD  
THERE WAS NO HOPE

Farm Short Course  
May be Given Soon  
at Aggie Congress

(By the Associated Press)

OKLAHOMA WOMAN WAS EXAMINED  
THREE TIMES AND TOLD SHE  
COULD NOT GET WELL

"I'm still enjoying good health, thanks to Tanlac; my best wishes to you all. I have nothing but praises for Tanlac. This statement I made three years ago about what Tanlac did for me was true in every way then and it is still true,"

is what Mrs. O. F. Sandridge, of box 201, Adair, Oklahoma, wrote to the Tanlac office a few days ago.

The statement to which she refers is as follows:

"Before I took Tanlac I was sick and had been for over a year with stomach trouble and other things and had been down in bed for months. I was examined three different times and was told there was no chance for me, and I had fallen off until I weighed only

ninety-three pounds.

"While I was discouraged and out of heart I still had hope of finding something that would bring relief and Tanlac proved to be the answer to my prayers. Wonderful is the only word that expresses the way it has benefited me. My stomach trouble and whatever else had been pinning me down is all gone now and I have gained twenty-one pounds in weight. It is just beyond words to express how happy I am over my restoration of health, and I will praise Tanlac the longest day I live."

Tanlac is sold in Ada by M. A. Waits and by leading druggists everywhere.

Short courses fro the second day include studies in soil moisture and organic matter, care and management of livestock, rations for beef cattle, poultry marketing, how to obtain good dairy cows and bulls, preparation of spray material for horticultural products, farm water system, newer methods in jelly making.

Crop rotation, hog judging, queen bee raising, apple and strawberry culture, farm motors, prevention and cure of parasitic diseases in sheep and hogs and sanitation and health in the home, will feature the third day's study.

For the fourth day, study in commercial grain of small grain, cattle judging, poultry diseases, testing skim milk and manufacture of dairy products, tomato and potato growing, sweet potato storage house construction, farm buildings, anthrax prevention and demonstrations in modern water and lighting systems, home decoration and simple steps in home improvement.

## DOMINION OF CANADA IS 54 YEARS OF AGE

(By the Associated Press)

WINNIPEG, Man., Aug. 6.—The Dominion of Canada is fifty-four years old. With celebrations of the confederation of the provinces just past, Dominion economists are reckoning the gaps spanned from a dependent colony to a sturdy growing nation and likewise taking stock of the future.

When the provinces were federated Canada had 3,000,000 people. This year's census will show over 9,000,000, it is expected. The immigration rate of 15,000 a year has grown to nearly 150,000, and this year promises even greater figures.

Since 1867, the surveys show, public revenue has grown from

\$19,335,561 to \$451,336,029. Imports in this period increased from \$67,090,159 to \$1,064,000,000 last year, and exports jumped from \$52,701,720 to \$287,000,000 in the same period. Money invested in manufacture was \$78,000,000. Today it is more than \$3,000,000,000. Banks have increased their branches from 123 to 4,500 and railway mileage has grown from 2,288 to 38,896 miles.

The development has been based

on agriculture. Only an insignificant amount of land was under cultivation at the time of the confederation. More than 800,000 farms now dot the landscape, with over 53,000,000 acres under cultivation.

Cattle, numbering 9,000,000, horses and sheep have won high international honors.

A good deal has transpired already to incline us strongly to the belief that we Republicans have as many ideals as anybody but merely won't admit it.—Ohio State Journal.

## ADA SMASHES OUT THREE HOME RUNS

Davis Nine Unable to Hit  
Ball to Field and Did  
not Score.

Playing errorless ball, hitting the ball to the four corners of the lot running bases like a deer before the hounds, the Ada baseball nine clipped off another victory Sunday by a 6 to 0 score. Davis was the victim.

Davis hit Waner for six safeties, but the visitors were unable to make the circuit. Ada touched Corley for eight hits, three of them being for four bases. Walter Wray, playing his first game in two years, hit the first ball pitched for a home run. Incidentally he played a dandy first base and fielded without an error. Paul Young was able to clout out a home run, and Waner not to be outdone followed suit.

Paul Young knocked the ball so far that "Bud" Gregg was compelled to go after it in his car, after Cannon, the ball chaser, was unable to get there on time.

Fain handled nine chances on second base and got away with them all. Paul Young worked all night Saturday night and still played the usual stellar game.

A new record was hung by Waner in one respect at least. Not a fly ball was hit to the outfield off his pitching. This is thought to be a record for the entire state season.

Zip West, catching, delivered a pinch hit in the fourth round, letting in Young ad Wray. Wray was out of wind, but had to run just the same.

Conn Roach, playing at shortstop was a wonder. He handled all the chances perfectly and hit a good one for good measure.

One of the interesting players of the day was Ellis, playing left field for the visitors. His two hundred pounds and his good nature made him a favorite with the fans, and he kept them chuckling all through the contest.

The game in general had more pep than any game of the season. Davis has a playing club, and they demonstrated ability to hit and field. Had they been against any thing but a close formation, they would have taken the big end of the scoring.

Cover was out of the game, but will be back next Sunday when the Ada boys meet the strong team from Weleetka.

Every one of the Ada Players except two hit Corley, Young touching him for two. Waner let six of the Davis men get a hit, but he let no individual get more than one.

The score:

DAVIS	AB	R	H	PO	A	E
Rawls, 1b	4	0	7	1	0	
Parker, 3b	4	0	1	0	0	
Garrison, cf	4	1	2	0	0	
Peterman, c	4	0	1	0	0	
Heims, 2b	4	0	4	2	1	
Ellis, lf	3	0	1	0	0	
Stewart, ss	3	0	1	3	1	
Aldridge, rf	3	0	1	0	0	
Corley, p	3	0	0	0	0	
	32	0	6	24	7	4
ADA.						
Roach ss	3	0	1	0	2	0
Fain 2nd	4	0	1	5	4	
Sparks rf.	4	0	1	0	0	
Young 3rd.	4	2	0	2	0	
P. Waner p.	4	1	1	1	5	
Wray 1st.	4	2	1	1	0	
MacMillan	3	0	0	0	0	
West c.	3	0	1	0	1	
Oliver lf.	4	0	0	0	0	
	33	5	8	27	14	0
Home runs, Wray, Young and P. Waner. Two base hits: Aldridge. Struck out by Waner 9, by Corley 9. Hit by Corley: Roach, MacMillan, West.						

### Locals from Roff

(From the Eagle)  
Joe L. Thomas was notified this week that his car, which was stolen two weeks ago, had been recovered at Ardmore. He went down Tuesday and returned with it.

The farm home of W. M. Dugger together with all its contents was destroyed by fire Tuesday morning. It is thought that the fire originated by the wall paper catching fire from an oil stove. The loss was partly covered by insurance.

Mrs. Maud Hunter, who attended the summer term of Oklahoma University, and son, Herbert, stopped off in Roff for a short visit with friends. They were en route to Denison where they will visit till school opens when they will return.

It becomes our sad duty to chronicle the death of Mrs. Chan Maupin which sad event occurred in a hospital at Sherman Saturday following an operation for ulcer of the stomach and gall stones. She was in the hospital a week after the operation before death relieved her of her sufferings.

The awning lights which our business men contracted with the Ada Light & Power Co. for recently were installed Saturday and gives Roff quite a different aspect to what it was before. Since we have had no street lights for the past year it seemed that action on the part of individuals was the last resort in getting street lights any way soon. Those who took light are Lee Gallahar, Crumley-Robnett Co., First National Bank, Morris Bros. Farmers & Merchants National Bank, Roff Merc. Co., Eagle Office.

## AGGIE SCHOOL TO HAVE SOAP PLANT

Slaughter House and Other Additions for A. and M. Is Planned.

(By the Associated Press)

STILLWATER, August 8.—The state board of agriculture has decided to build a slaughter house on the A. and M. college farm here and in connection with the slaughter house, a soap making plant will be erected, according to word received here from John A. Whitehurst, president of the board of agriculture.

"It's not to train a new crop of butchers," President Whitehurst said, "and neither is it to equip college girls with knowledge of work that they may obtain positions in soap factories. The idea is that the Oklahoma farmer should get back to the old fashioned practice of killing his own meat, and the farmers' wife should know how to help in saving all the by products."

Every farmer used to kill his own cattle, but it's a lost art now, according to Whitehurst. Now the farmer sells the livestock and then buys packer prepared products for home consumption. Where farm women once rendered their own lard the present farm women seem to prefer to buy from the dug store.

The present day farmer has it "all over" the old fashioned farmer he said. Then there was much waste in hog killing and few of the by-products were used. There are improved methods at his command now, and he has every opportunity to take advantage of the aid offered him.

"A student may be told what to buy, and what to feed, but he forgets. That's natural," Whitehurst said, "but if he cuts the beef himself, he'll know what breeds and what sort of feeding produce the greatest percentage of high priced steaks."

The plant, according to the department of agriculture's announcement, will be large enough to handle four or five beavers a day, and as many as ten or fifteen hogs. It will be made self supporting if possible, but turning the products to the college cafeteria, and to Stillwater markets for consumption.

The plant will be in order by September 6, if present plans materialize and there is no reason why delay should occur, agricultural department officials said.

## MAYOR'S THREAT ON CAR COMPANY TO BE OPPOSED

OKLAHOMA CITY, August 8.—A threat by J. C. Walton, mayor of Oklahoma City that he will require the Oklahoma Railway company to complete its Lincoln Park extension by January 1, 1922, and that if a \$100,000 bond is not put up, he will file a petition before the corporation commission asking for a reduction of the city fare to five cents, is meeting opposition from most of the members of the city commission.

"Just a cheap political play," was the way the move was characterized by Warren E. Moore, commissioner of public works. Commissioner Bob Parman took somewhat a similar stand expressing the belief that a five cent fare would put the company in the hands of the receivers.

The street railway company asked for an extension of time for completion of the Lincoln Park line until April 1 in order that it might be able to complete many improvements being made to the lines within the city limits. The street railway company declares that if the city insists it will complete the Park line by January 1, and let other city improvements go over for the time being. The company considered that the best interests of the city demanded that the work within the city limits be done first.

Discussing the matter City Commissioner Warren E. Moore said: "I believe the car company can be trusted, and the extension of time has been asked merely because we felt that the city improvement work should be done first, and that if the Lincoln Park line was completed by April 1 instead of January 1, it would make no particular difference so far as the public was concerned, as the park won't be generally used until April 1, anyway. If the mayor persists in his course, I for one shall never ask the car company to make any more improvements. You've got to be just, and that company has never paid dividends on its stock more than twice, and then only on preferred stock. With a five cent fare they couldn't operate. People say seven cents for a coca cola and don't kick, but they'll ride from Pickington to Belle Isle for seven cents and claim they're cheated.

Moore declared that the extensive use of automobiles makes it impossible for a car company to operate on five cent fares as in the past, and said that the city might lose its street railway system altogether, as did Des Moines, Iowa, if the mayor carried out his threat. The best interests of the city will be met, he said, if the company is allowed to make its street improvements now, and complete the Lincoln Park line by April 1. He said that the idea of \$100,000 is absurd.

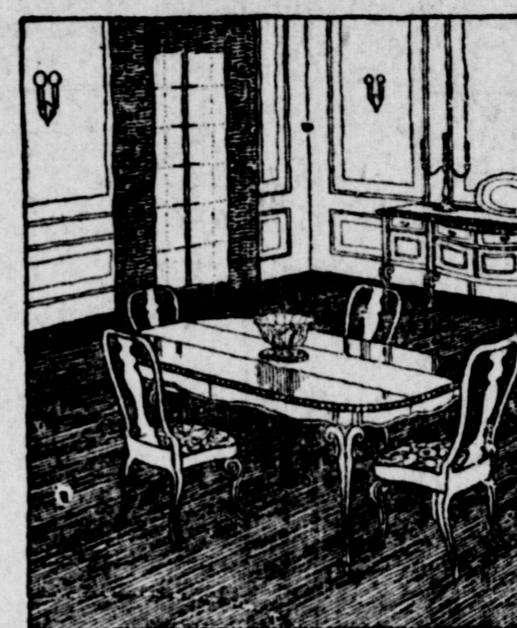

## CAR OF HOGS SHIPPED TO OKLAHOMA CITY

Jim Whitaker, who lives west of Ada, shipped a car of hogs to Oklahoma City Monday. There were about 100 in the lot and they were in good condition.

Plainview, Diary, Phone RM-25.

A. B. Myers, Proprietor.
